ASSIGNMENT - I

Auditing of information System involves a planned and documented activity performed by a qualified ICT personnel to determine by investigation, examination or evaluation of objective evidence, the <u>adequacy</u> and <u>compliance</u> with established procedures or applicable instruments, and the effectiveness of implementation of such Information Systems.

Increasingly, users expect organizations to be accountable not only in the usage and protection of their personal data, but also in conveying the purpose(s) of data collection, use, disclosure,etc, as well as their <u>applicable data protection instruments</u>, in a way that is easy to understand. Providing clear and concise standards and procedures is one way to put one's organisation ahead of others.

Required:

Critically assess the applicable data protection instruments and key data processing activities required for each instrument in Malawi.
